

SKIN BOOSTERS

—♡ INFORMATION BOOKLET ♡—

Hydrate. Revive. Illuminate.

Nourish your skin from within for a naturally radiant glow.

WHAT ARE SKIN BOOSTERS?

Skin boosters are micro-injectable treatments designed to deeply hydrate, nourish and rejuvenate the skin. They improve skin quality, elasticity and texture by delivering powerful ingredients directly into the skin.

HOW DO THEY WORK?

Using micro-injections, skin boosters deliver hyaluronic acid or specialised ingredients into the deeper layers of the skin. This stimulates collagen, improves hydration and enhances skin cell function, resulting in smoother, plumper, more radiant skin.

AREAS THAT CAN BE TREATED

UNDER EYES

Brighten and refresh tired eyes

FACE

Improve overall skin quality, radiance and texture

NECK

Restore hydration and firmness

DÉCOLLETAGE

Smooth and revitalise crepey skin

SCALP / HAIR

Improve scalp health and support hair growth

HOW SKIN BOOSTERS CAN HELP YOUR SKIN

- ♡ Intense hydration and moisture retention
- ♡ Improved skin texture and elasticity
- ♡ Smoother fine lines and wrinkles
- ♡ Enhanced radiance and natural glow
- ♡ Strengthens the skin barrier
- ♡ Long-term improvement in skin health
- ♡ Helps with dullness, uneven tone and dehydration

SPECIALISED BOOSTERS

POLYNUCLEOTIDES

Polynucleotides are biocompatible DNA fragments that repair and regenerate skin tissue. They stimulate collagen, improve elasticity and promote natural healing – ideal for ageing, acne scarring and damaged skin.

EXOSOMES

Exosomes are tiny messengers derived from stem cells that promote cell communication and regeneration. They boost collagen production, improve skin texture and accelerate repair.

COMBINATION BOOSTERS

A powerful blend of ingredients such as hyaluronic acid, peptides, exosomes and polynucleotides for targeted rejuvenation and long-lasting skin improvement.

We offer a range of advanced skin boosters tailored to your unique skin needs.

Please ask for further information for your specific skin concern for a tailored skin booster solution.

COMMON RISKS / SIDE EFFECTS

- Mild redness
- Swelling or tenderness
- Bruising at the injection site
- Small bumps (usually resolve within 24–48 hours)
- Rare: infection or allergic reaction

These side effects are usually mild and temporary and resolve within a few days.

LENGTH OF EFFICACY

Results typically last 4–6 months, depending on the type of booster, your skin condition and lifestyle.

FREQUENCY OF TREATMENT

A course of 2–3 treatments spaced 2–4 weeks apart is recommended for optimal results, followed by maintenance treatments every 4–6 months.

PRE-TREATMENT CARE

- Avoid alcohol, aspirin, ibuprofen and fish oil for 24–48 hours before treatment (if medically suitable).
- Stay well hydrated and eat a balanced diet.
- Avoid excessive sun exposure and tanning treatments.
- Inform your nurse of any medications, medical conditions or allergies.
- Arrive with clean skin, free from makeup and skincare.

POST-TREATMENT CARE

- Avoid touching or rubbing the treated area for 24 hours.
- Avoid strenuous exercise, saunas and excessive heat for 24–48 hours.
- Avoid alcohol for 24 hours.
- Keep skin hydrated and use gentle skincare products.
- Makeup can be applied after 4–6 hours if needed.
- Your skin may feel slightly bumpy or tender – this is normal and will settle within a few days.

YOUR GLOW, OUR PRIORITY

Skin boosters are perfect for anyone wanting to improve skin health, hydration and radiance from within.

We are here to help you achieve your most radiant, confident skin.

Because beautiful skin begins with expert care.
